

Chikungunya virus disease -- United States, 2015
Provisional data reported to ArboNET
Tuesday, July 21, 2015

Chikungunya virus disease is now a nationally notifiable condition. Cases are reported to CDC by state and local health departments using standard case definitions. This update from the CDC Arboviral Disease Branch includes provisional data reported to ArboNET for **January 1 – July 21, 2015**.

As of July 21, a total of 237 chikungunya virus disease cases have been reported to ArboNET from 34 U.S. states (Figure & Table 1). All reported cases occurred in travelers returning from affected areas. No locally-transmitted cases have been reported from U.S. states.

A total of 97 chikungunya virus disease cases have been reported to ArboNET from U.S. territories (Table 2). All reported cases were locally-transmitted cases reported from Puerto Rico and the US Virgin Islands.
