

Mr. Angel Monges,

██████████ respectfully requests clarification on the above mentioned ITB.

#### VI. SOPE of WORK

The pre-engineered, pre-fabricated building should be delivered on-site ready for assembly as a complete kit with plans.

#### VII. SUBMISSION REQUIREMENTS

##### TAB B METHODOLOGY and TECHNICAL AAPPROACH

1. Provide a narrative description of the Firms' plan to accomplish the work and services to be provided to the District.
2. Clearly acknowledge your understanding of the scope of work, including a detailed approach to completing this project in a phase by phase fashion, including the time frame expected to complete each phase and staff assignments for each phase of the project.
3. Provide suggestions and ideas for completing this project in an efficient, effective and innovative manner.
4. Clearly identify materials and knowledge resources that the Firm will need from the District to complete this project.
5. Identify progress reports that will be made available during the process and key decision points.
6. Clearly distinguish the Firms' duties and responsibilities and those of the District. Absence of this distinction shall mean the Firm is assuming full responsibility for all tasks.

Can you please confirm if the referenced ITB is for only purchasing and delivering a PEMB ready for assembly as a kit with plans only? If so, how are we to respond accurately to Tab B Methodology?

Response:

The scope of work encompassed in this RFP only includes the purchase and delivery a pre-engineered metal building kit. The kit should consist of all parts necessary to construct the building; however, construction of the pre-engineered metal building will be completed at a later date and is not included in the scope of this RFP.
